**Rio Tinto Limited successfully completes A$750 million off-market buy-back**

13 November 2017

Rio Tinto has successfully completed its off-market buy-back of Rio Tinto Limited shares, which was increased to A$750 million from the indicative A$700 million announced due to strong demand. The Buy-Back Price was A$63.67 per Share which represented a discount of 14 per cent to the Market Price¹.

The Rio Tinto Limited Buy-Back was announced to the Australian Securities Exchange (“ASX”) on 22 September 2017 as part of a US$2.5 billion share buy-back programme (the “Programme”), returning the proceeds from the sale of Coal & Allied to Rio Tinto shareholders.

Rio Tinto Limited bought back approximately 11.8 million Shares, at an aggregate cost of A$750 million (US$575 million²). This represents 2.78 per cent of Rio Tinto Limited’s issued ordinary share capital (or 0.66 per cent of the Rio Tinto Group’s issued ordinary share capital³). Following completion, Rio Tinto Limited’s issued share capital will stand at 412,414,348 shares.

The portion of the Programme relating to the on-market buy-back of Rio Tinto plc shares will now total a maximum amount of US$1,925 million and will commence on 27 December 2017 and will be completed no later than 31 December 2018. As previously announced, Rio Tinto plc has entered into a separate non-discretionary irrevocable instruction for an aggregate maximum consideration of up to $300 million for the period between 27 December 2017 and 28 February 2018 as part of the on-market portion of the Programme.

All shares purchased will be cancelled.

Due to the significant oversubscription for the Buy-Back, an 89.33 per cent scale back of Tenders was required. Subject to exclusions set out in the Buy-Back Booklet, shareholders who tendered their shares at a 14 per cent Tender Discount to the Market Price or as a Final Price Tender will have a Priority Allocation of 75 shares bought back before the scale back is applied. Successful shareholders who tendered all of their shares at a 14 per cent tender discount to the Market Price or as a Final Price Tender and who would be left with 30 shares or less as a result of the Priority Allocation and scale back, will have all of their shares bought back in full.

The Buy-Back Price was greater than any Minimum Price and hence all eligible price conditional tenders were included in the scale back calculations. Shares tendered at discounts less than or equal to 13 per cent were not bought back.

Further details of the outcome of the Buy-Back are set out in the attached appendix.

\(^4\) As agreed with the Australian Taxation Office, the Tax Value has been determined by adjusting the volume weighted average price of Rio Tinto Limited’s ordinary shares over the last five trading days up to and including 21 September 2017 (being A$66.48) by the percentage movement in the Rio Tinto plc share price from the close of trading on the London Stock Exchange on 21 September 2017 (£34.655) to the opening of trading on the London Stock Exchange on 10 November 2017 (£37.02).
